

Variations: Suggestions made by teachers and parents.

These will be updated periodically

Sammy Savings: Rewarding the player by adding interest to all money saved at the end of each round. Give 10 c for every dollar saved in the Sammy Savings rectangle. A great way to introduce Compound Interest and the benefits of Saving.

Players may upgrade their counter to a Lego piece for a fee.

Students can add their own cards to the mix.

Players may pass their Expense card to a player of their choice, once during the game.

If player is close to being bankrupt, the player with the most money can decide who that “bankrupt” player must join forces with.

If a player is about to go bankrupt, the bank will loan money to the player but must pay a penalty of \$5 back to the bank over the duration of the game. This is a bankruptcy, administration and interest charged fee.
